Bag/Carton  
Weigh Filler

# Bag/Carton Weigh Filler Technical Data

# BW-10/50

Fill bags or boxes

Double auger filling method  
(coarse and fine feed)

Touch Screen Control  
(with recipe selection)

## RANGE OF APPLICATION

- For Food, Medical, Pet food, chemical industry, etc.
- For fixed quantity packaging for powder & grains material .  
Example: Milk powder, spices, bean products, pet food, metallic powder, plastic granules grains & various chemical materials.

## SPECIALTY

- Multi-function, simple structure, small footprint.
- 304 stainless steel for the whole machine, all contact parts are highly polished to meet food hygiene requirement.
- Double auger filling method (coarse & fine), high speed, high accuracy.

- Easy to dismantle and clean, thus reducing labour requirements.
- Well designed holding hopper, sanitary finish which avoids dead/blind corners. Comes with sight glass window & low material level detector.

## OPTIONS

- Sack holder.
- Leak proof seal (for free flowing products).
- Bag sewing machine
- Conveyor
- Weigher/scale on bottom platform
- Finished package bag tilting device
- Bag heat sealing machine or vacuum & nitrogen filling device.

## SPECIFICATIONS

Model BW-10/50  
Filling Type: By weight or volume.  
Filling Mode: dual/double screw filling/feeding  
Weigh/Fill Range: 10 - 50Kg  
Accuracy: +/- 10 to 25g (depending on product characteristics & filling speed).  
Speed/Capacity: ≥ 3 bags/min  
Packaging Types: Paper/Kraft plastic bags, carton, tube, etc.  
Power requirements: 240v / 50Hz /single-phase  
Total Power: 1.8KW  
Weight of machine: 200Kg  
Air Requirements: 5-6Kg/cm<sup>2</sup>  
Overall Dimensions: 1470L x 980W \* 2300H
